PROFESSIONAL SUMMARY

Fullstack Web and Mobile Developer with 4+ years of experience building products people actually enjoy using. I work across the full stack — MERN on the web, React Native on mobile — and care deeply about the details: clean code, smooth UIs, and backends that hold up under pressure. I've shipped everything from house-rental platforms and artisan-finding apps to AI-powered social tools, mostly in fast-moving startup environments where wearing multiple hats is the norm. I communicate well, move with precision, and genuinely enjoy turning a rough idea into something real.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Frameworks & Libraries: React, Next.js, React Native (Expo), Express.js, Node.js, Svelte Kit, Tailwind CSS, Shadcn UI, Vite.js, Supabase

Databases & Backend: MongoDB, Supabase, REST APIs, MERN Stack

Tools: Git & GitHub, Visual Studio Code, Figma, Postman, Canva

AI Tools: Claude Code, OpenAI Codex, ChatGPT, Antigravity, Midjourney

Soft Skills: Communication · Leadership · Creative Problem-Solving · Precision · Team Collaboration

PROFESSIONAL EXPERIENCE

Fullstack Software Developer (Web & Mobile) · Briteflux Limited | May 2025 – Present

- Designed and implemented the UI and backend of BriteVillas.com.ng, a full-featured house renting and listing platform
- Designed and implemented the UI of BriteSkills, an artisan-finding mobile app built with React Native (Expo)
- Built in-house tools, waitlists, and short-term ad/marketing pages to support product launches

Stack: MERN · React Native (Expo)

Frontend Developer · Bulqsoft Limited | June 2025 – February 2026

- Converted high-fidelity UI designs into fully functional, production-ready applications across multiple products in the company's portfolio
- Collaborated with backend engineers to integrate APIs and deliver seamless user experiences

Stack: MERN

Fullstack Software Developer (Side Project) · Job & Me | May 2026

- Designed and implemented an interactive UI connecting users with skilled artisan tradespeople
- Architected and built the backend, including user auth, listings, and messaging systems
- Integrated payment gateways to support premium features and transactions

Stack: MERN | Live: [jobandme.vercel.app](#)

Frontend Developer (Lead) · Greatsome Innovations I.T. Firm | November 2023 – Present

- Built administrator dashboards for financial institutions
- Developed document management and learning management system UIs (user-facing and admin)
- Integrated REST APIs across all delivered projects

Full Stack Developer · Night Class Store | January 2024 – November 2024

- Built a web app allowing users to order and sell food
- Developed an orders management system for internal employee use
- Designed and deployed a Supabase backend to manage data and business logic

Frontend Developer (Contract) · My Ziji | April 2025 – May 2025

- Built the web app interface including landing pages and billing/subscription interfaces
- Integrated third-party APIs and payment flows

Web Developer (Freelance) · Winners Campus Fellowship | May 2023 – November 2023

- Built the fellowship's official landing page, establishing its online presence
- Integrated social handles and set up a data collection form, improving event broadcast rates

Web Developer (Freelance) · **Sharon Bovea Agribusiness** | *March 2023 – May 2023*

- Built the company's website with e-commerce functionality, expanding statewide order reach
- Integrated social media handles and newsletter service to the platform

FEATURED PROJECTS

Job & Me

- Gigs posting platform

Stack: Vite.js, React, Tailwind CSS, REST APIs | Live: jobandme.vercel.app

My Ziji — AI Social Media Platform

- AI-powered platform for social media creators to generate content and manage workflows; subscription billing via Stripe

Stack: Vite.js, Tailwind CSS, Shadcn UI, Stripe
